

Accessing the Course Environment

1. Log in to [Csc Notebooks](#) with your MyCSC / Haka account. If you don't have one, you can send an email to request a guest account.
2. Click on 'My Workspaces'

3. Click on the 'Join Workspace' button at the top right-hand corner.

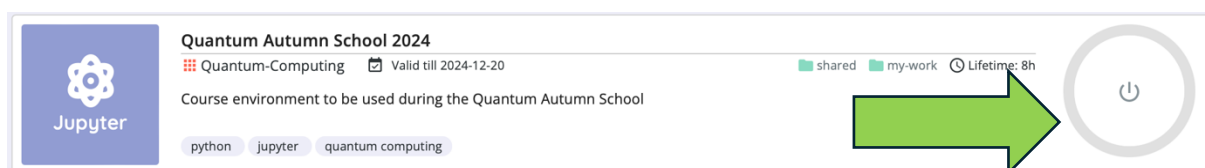

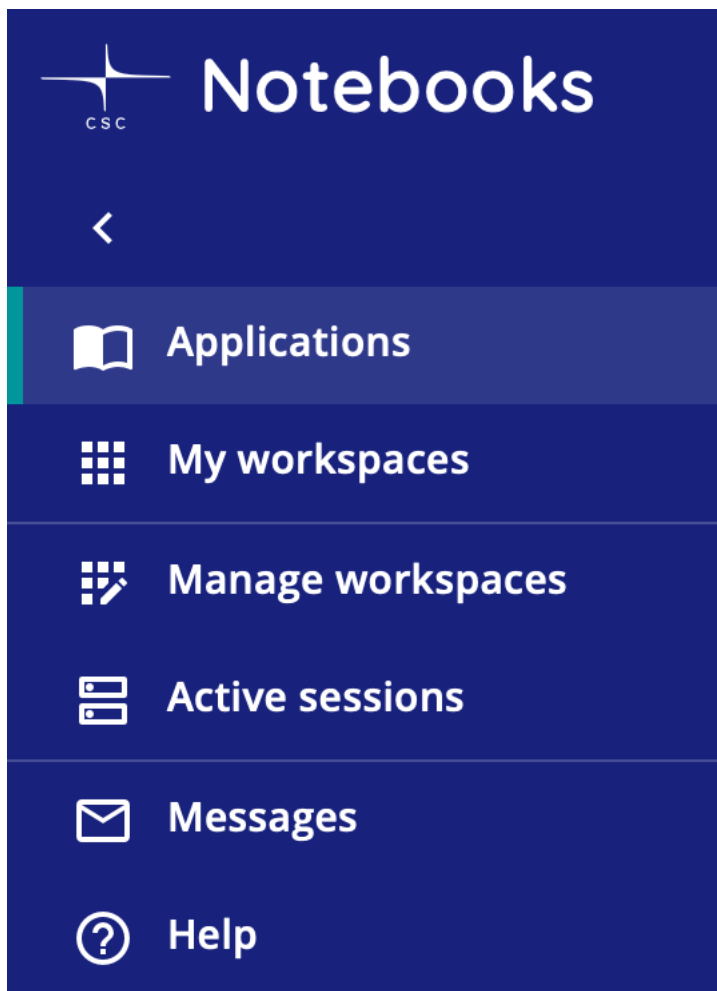

4. The workspace code will be sent to your email along with your guest account details. Input the code and click the '+' sign

Join Workspace ✕

 Enter Join Code +

5. You now have access to the workspace

6. Go to Applications and under **Quantum Autumn School 2024**, click on the power control button on the right end (arrow pointing).

7. The environment will be ready within a few seconds, then, you can click on the power control button (see image below) to launch the Jupyter Notebook

8. Navigate to ``my-work`` folder to create new notebooks (for data persistence)

9. When you are finished, you can delete the application session using the power control button

This environment gives each user 8 hours per session. ``my-work`` folder persists until the workspace expires, so it is good for backing up your data
